BiciCleaner Washing Station

BCW.L0001

All components are designed to remain outdoors for years with minimal maintenance, built to withstand even the most extreme conditions. Our urban furniture is designed for use in the harshest environments. All steel components are treated with Joma Marine™ technology and come with a lifetime guarantee against rust. This process produces a high-quality anti-corrosion finish that meets the strict requirements of corrosivity category C5 (EN ISO 12944), ensuring that our products can remain outdoors for several decades. All fasteners are supplied in stainless steel. The process begins with a thorough cleaning and pre-treatment of each component. The parts are submerged in a series of immersion tanks filled with degreasing agents, purified water, and activators. The cathodic electrocoating process is then carried out — an immersion painting process based on the displacement of charged particles within an electric field toward the opposite pole. By applying an electrical potential difference, the paint molecules are deposited uniformly onto the component. This process produces an anti-corrosion coating that allows our products to remain outdoors for several decades. It is carried out in accordance with the strict environmental requirements defined in ISO 12944. The powder coating is completely solvent-free and is applied electrostatically through automatic nozzles. The powder is polymerized in an automated oven to give the product its final appearance and guarantee.

TENDER TEXT · BCW.L0001

Urban bicycle washing and cleaning station point Bicicleaner, reference BCW.L0001 by Joma Urban, made of carbon steel with metallisation and cold electrolytic galvanising treatment and anti-UV epoxy thermoplastic paint, with the option of adapting the RAL colour. It has a concealed water collection system in the base, a grille with a universal washing support to facilitate maintenance and cleaning operations, and 4 cleaning accessories specific to bicycles mounted on a Ø6mm PVC-coated stainless steel cable. It also has a low-pressure washing gun to avoid damaging the bicycle components.
